

ionuv[®] UV sanitizer mini wand

tzumi[®]

Introduction & Features

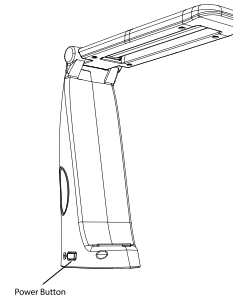

The Wand mini handheld UV light sanitizer kills germs and bacteria instantaneously without the hassle of wet cleaning wipes or detergents. The handheld sanitizer ideally disinfects an array of items including gadgets, iPads, laptops, remote controls, doorknobs, toilet-covers, steering wheels, toys, bedsheets and more. Utilizing powerful UV technology, it significantly kills microscopic germs, mold and dust mites on any surface without leaving any harmful residues or odors. Its simple foldable design allows you to use it anywhere on the go, ideal for use at home or while travelling. Micro USB charging allows you to conveniently charge it from any power source.

Package Contents:

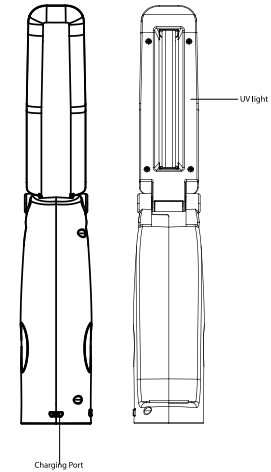

- Sanitizing wand
- USB Cable
- Manual

Product Overview and Functions

- Laboratory proven to kill and eliminate up to 99.9% of bacteria and germs in less than one minute.

- Sanitizes doorknobs, bathrooms surfaces and other household items quickly and easily without chemicals or irritants.
- Travel friendly, easily fits in your purse or luggage.

Product Overview and Functions (continued)

Setting up and Using the Sanitizer Wand

NOTE: DO NOT EXPOSE SKIN OR EYES DIRECTLY TO THE WAND UV LIGHT

- The power button and indicator light are located at the base of the wand.
- To turn on the sanitizing wand press the power button for 2 seconds.
- The UV light will turn on and the indicator light will light-up blue while the wand is on.
- To turn the wand off press the power button at the base of the wand.

There are two ways to sanitize using this wand

1. Begin by holding the sanitizing wand as close as possible and no more than one-half inch above the object's surface. Move slowly across the object surface making sure that it gets at least 20 seconds of disinfecting UV light. 30 Seconds is recommended.
2. When disinfecting objects in the stand-alone position place the objects directly under the UV light and allow the UV light to penetrate it for at least 10 minutes.

NOTE: AS A SAFETY MEASURE WHEN THE UV LIGHT RADIATES UPWARD THE POWER SUPPLY WILL AUTOMATICALLY TURN OFF TO AVOID CAUSING INJURY TO THE EYES.

To Charge the Wand

- Plug the provided MicroUSB cable into the charging port, plug the USB end into a USB power source.
- The indicator light will light-up red while charging
- When the wand is fully charged the indicator light will turn off.

Troubleshooting

- **The wand will not turn on**
Make sure that the wand is facing downwards not upwards.
- Ensure that the Wand sanitizer is charged.
